Career Objective

A pro-active individual with strong programming and creativity skills. Focused on building my career as a developer and actively seeking opportunities to join a progressive organization where I can gain valuable work experience.

Education

Technocrats Institute of Technology , Bhopal, India B.Tech - Electronics and Communication Engineering, CGPA: 8.70	Aug 2020 - June 2024
R.N. College , Hajipur, Vaishali, Bihar 12th, Percentage: 82.80	July 2018 - Mar 2020
G A INTER SCHOOL , Hajipur, Vaishali, Bihar 10th, Percentage: 72.40	Mar 2017 - June 2018

Experience

LRDE-DRDO (Electronics and Radar Development Establishment) , Bangalore, Karnataka	Sep 2025 – Present
---	---------------------------

Apprenticeship Trainee

- Working on Radar Technology projects and gaining hands-on experience in defense and radar systems.
- Developed a **Log Analyzer Software** for radar projects using **Qt, C++, and Socket Programming (UDP/TCP)** for analyzing and monitoring radar communication logs.
- Currently working on **Radar Display Software** development using Qt and C++.
- Learned concepts of radar systems, communication protocols, real-time data processing, and GUI application development.
- Improved knowledge in **Qt Framework, C++, Networking, Multithreading, and Software Development** for real-time applications.

Training/Internship

JSpiders Training and Development Center, Bangalore, Karnataka

Java Full Stack Developer

- Training on front-end and back-end development.
- Hands-on API integration, web app development, and database management.
- Applied knowledge in real-world projects.

Skills

Languages: C++, Core Java, C Technologies: Qt GUI, HTML, CSS, JavaScript Frameworks: Qt, ReactJS, Hibernate, Spring Boot Database: MySQL, Oracle SQL	Tools: Qt Creator, Eclipse, VS Code, Tomcat, Postman Others: OOPs, Data Structures and Algorithms, Socket Programming, UDP/TCP, Multithreading, Problem Solving
---	--

Projects

Hospital Management System ([GitHub Link](#))

- Developed a web-based hospital management system to manage doctors, patients, and appointments efficiently.
- Implemented user authentication for secure admin and user logins.
- Built robust backend functionalities using Java Servlets and JDBC for data processing and database interaction.
- Managed MySQL database for storing patient records, doctor details, and appointment schedules.
- Deployed the application on Apache Tomcat and ensured database connectivity using JDBC.
- Technologies: Java, Servlet, JDBC, MySQL, HTML, CSS, JavaScript, Bootstrap, JSP, Apache Tomcat, Eclipse IDE

Student Management System ([GitHub Link](#))

- Developed a web-based application to manage student records with CRUD operations (Create, Read, Update, Delete).
- Implemented user authentication (login/logout) with session management to secure access.
- Integrated MySQL database with JDBC for data persistence and retrieval.
- Technologies Used: Java (Servlet, JDBC), JSP, HTML, CSS, JavaScript, Bootstrap, MySQL.

Banking Application - Spring Boot ([GitHub Link](#))

- Developed a Spring Boot-based banking application that provides core banking functionalities like account creation, deposit, withdrawal, and deletion via REST APIs.
- Integrated Hibernate and JPA for ORM, ensuring efficient data interaction with MySQL for robust and persistent storage.
- Technologies: Java, Spring Boot, Spring Data JPA, MySQL, REST API.

Certifications

C/C++ - Solo Learn
Basic Java - HackerRank
Learn Spring and Spring Boot - LinkedIn
Problem Solving - HackerRank
Basic SQL - HackerRank
